WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cage 2100 x 1400 x 1800 mm, no floor, open top: six panels of 50 x 50 x 4 welded mesh on 40 x 40 x 4 angle frames (60 mm), bolted together at the corners with M8 bolts.

Aisle face: gate opening 1200 wide, 350 from the export-door end.

Gates (make 2): 590 x 1770 mesh leaves, 20 mm off the floor, two self-closing hinges each, drop bolt on one, padlock hasp.

Fit: 170 mm clear of the intake end wall, 96 mm from the back wall; angle cleats screwed to the floor at each corner.

Gates open into the aisle only while loading; keep them shut.

Check: both gates swing fully open, shut themselves and lock.
