WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Rack 1200 x 600 x 1800 mm: four posts of 40 x 40 x 3 SHS, 1800 long, tied at top and bottom by the tray runners.

Runners: 25 x 25 x 3 angle welded across the posts at 160 mm pitch, ten levels from 200 mm up (top tray at 1640).

Trays (make 10): 1120 x 600 frames of 25 x 25 x 3 angle with stainless mesh, about 2 mm aperture, riveted in.

Fan stand: base plate 500 x 300 x 10, post of 60 x 60 x 3 SHS 590 long welded on; fan bolted on top, axis 900 up.

Fit: rack on the floor, 120 mm from the front wall; fan stand in front, fan face 100 mm from the trays, blowing through them.

Check: every tray slides out with one hand when full.
